

Dear Members,

We are currently collecting unwanted mobile phones to raise money for our club and to help protect the environment.

Please would you offer your support by sending us any unwanted phones you may have. On average each home has three unwanted phones, which tend to be disposed of with the household refuse and find their way to landfill. Recycling will reduce landfill and prevent dangerous chemical and metal substances leaking into the ground and water drainage system.

We would appreciate it if you would encourage family, friends and work colleagues to donate any unwanted mobile phones they may have, in order for us to collect as many as possible.

If you can help us with this recycling scheme to raise funds for our club, please send in your phones in the next two weeks,

Thank you for your support.
